Tick Submission Form

Ticks may be submitted that have been found on or removed from either humans or animals. Ticks can be submitted dead or alive. The result of the test confirms the presence or absence of the pathogen in the tick but does not confirm exposure to the patient. The result is intended to provide you and your physician or veterinarian with important information, when combined with other information, to help determine risk of exposure and subsequent clinical treatment and follow-up.

Note: In order to process your submission efficiently, this form must be filled out and sent along with the sample.

Select the Type(s) of Analysis Required (Check All That Apply): Turn-around is typically 7 business days

_____ Tick Identification (Included free of charge with any of the tests described below)	\$15.00
_____ Diagnostic Panel I – Test for the infectious agents Lyme, Ehrlichia, Babesia and Bartonella	\$175.00

Services are provided by the Northeast Infectious Disease Diagnostic Laboratory in accordance with their standard procedures, terms and conditions. Test turn-around is typically 7 business days and within 3 business days for rush services. You will be notified with a positive or negative result. The tick is tested for an infectious agent using a sensitive DNA based screening technique known as Polymerase Chain Reaction (PCR). Prices are subject to change without notice.
